Agency Forms Undergoing Paperwork Reduction Act Review

The Centers for Disease Control and Prevention (CDC) publishes a list of information collection requests under review by the Office of Management and Budget (OMB) in compliance with the

Paperwork Reduction Act (44 U.S.C. Chapter 35). To request a copy of these requests, call the CDC Reports Clearance Officer at (404) 639-7090. Send written comments to CDC, Desk Officer; Human Resources and Housing Branch, New Executive Office Building, Room 10235; Washington, DC 20503. Written comments should be received within 30 days of this notice.

Proposed Project

1. National Sexually Transmitted Disease Morbidity Surveillance System—Extension—(0920-0011)—The National Center for HIV, STD, and TB Prevention (NCHSTP)—The reports used for this surveillance system provide ongoing surveillance data on national sexually transmitted disease morbidity. The data are used by health care planners at the national, state, and local (including selected metropolitan and territorial health departments)

levels to develop and evaluate STD prevention and control programs. In addition, there are many other users of the data including scientists, researchers, educators, and the media. STD data gathered in these reports are used to produce national statistics published in the annual STD Surveillance Report, MMWR articles, and serve as a progress report to meet objectives in *Healthy People 2000: Midcourse Review and 1995 Revisions*. It is important to note that these reporting forms are in the process of being phased out and replaced by electronic, line-listed STD data collected in the *National Electronic Telecommunications System for Surveillance* (NETSS).

Costs are covered by way of cooperative agreements to the project areas. The total annual burden hours are 828.

Forms	No. of respondents	No. of responses/re-spondent	Avg. burden (in hrs.)
CDC 73.688*	36	4	1
CDC 73.688**	27	4	1
CDC 73.998	36	12	0.5833
CDC 73.2638	36	3	3

* *State-level reporting:* Respondents for the state-specific CDC 73.688 forms now include 26 state health departments (Originally, respondents included 50 states, but 24 states have now discontinued hardcopy reporting and send all STD data as electronic line-listed records through NETSS), seven large city health departments and three outlying areas.

** *City-level reporting:* The health departments for the 26 states and one of the outlying regions (Puerto Rico) also prepare and submit reports for additional large cities within their jurisdictions.

Dated: September 9, 1999.

Nancy Cheal,

Acting Associate Director for Policy, Planning and Evaluation, Centers for Disease Control and Prevention (CDC).

Proposed Project

Training Intervention Effectiveness Research of Vocational Education Safety and Health Instructional Materials—New—The National Institute for Occupational Safety and Health (NIOSH) is proposing to study the

effectiveness of safety and health curricula to be made available for secondary vocational schools. Studies conducted by NIOSH suggest that over half of all young workers injured on-the-job believe that they did not receive adequate safety and health training in school or from their employers. The National Safety Council estimates that nearly one-half (48.1%) of all occupational injuries are sustained by employees with less than one year of work experience. Further-more, feedback from end-users of past NIOSH vocational education materials indicates that these materials do not adequately meet the needs of vocational teachers and students. Given these considerations, further training intervention effectiveness research is
